¹ The exporter numbers are derived from the Shipper's Export Declaration form, which does not directly ask the state of manufacture of exported goods. "Exporters often are intermediaries who export goods that were produced or purchased in a state different than their own." These exporter numbers are "based on the state from which the merchandise starts its journey to the port of export; i.e., the transportation origin. This information is reported by the exporter."

NA & NC = not available & not calculable; SME = small- & medium-sized exporters (those with <500 employees)
