001.06. Criteria for Evaluating Grant Applications. The Department shall evaluate all applications for Grants based on the following criteria:

1) Retention Impact. Funding decisions by the Department shall be based on the likelihood of the project retaining existing residents in the community where the project is located, developing, sustaining, and fostering community connections, and enhancing the potential for economic growth in a manner that will sustain the quality of life and promote long-term economic development;

2) New Resident Impact. Funding decisions by the Department shall be based on the likelihood of the project attracting new residents to the community where the project is located.

3) Visitor Impact. Funding decisions by the Department shall be based on the likelihood of the project enhancing or creating an attraction that would increase the potential of visitors to the community where the project is located from inside and outside the state.

4) Financial support. Assistance from the Fund must be matched at least equally from Local Sources. At least fifty percent of the Local Match must be in cash. Projects with a higher level of local matching funds shall be preferred over those with a lower level of matching funds. Neither the local match nor the items listed for grant assistance should include amounts already expended prior to the date of application for a Grant.

5) Readiness. The applicant's fiscal and economic capacity to finance the local share and ability to proceed and implement its plan and operate the Facility.

6) Project location. A Project shall be located in the municipality that applies for the Grant.

7) Project Planning. Projects with completed technical assistance and feasibility studies shall be preferred to those with no prior planning.

001.07. Conditional Approval for Grants. Department approval of a Grant is conditional on appropriation of funds by the Legislature. Projects shall receive grant funding in the order conditional approval is received and whenever there is sufficient money in the Fund to provide assistance. If the Department gives conditional approval to a Project and, one or more days later, to another Project, the earlier Project is first in order. If conditional approval is given to more than one Project on the same day, the Project first in the order is the one most preferred in a rank ordering of Projects approved by the Department on that day. In any calendar year when the Department may accept applications for Grants, it may accept the applications during one or more application cycles. These cycles will be set forth in annually issued Application Guidelines stating the timeframe and manner in which applications are to be submitted. It is the intent of the Legislature to appropriate funds to support Projects which have received conditional approval from the Department. A Grant shall be finally approved when funds for the Project are appropriated by the Legislature.

001.08. Application Guidelines. The Department may issue annual Application Guidelines for the Fund; consisting of the time and manner applications shall be received, reviewed and awarded.

001.09. Annual Report. The Department shall submit, as part of its annual status report on the activities and impacts of the Department and its programs, information documenting the Grants conditionally approved for funding by the Legislature in the following fiscal year. The status report shall be submitted to the Governor and the Legislature on the first working day of July of each year.
